The image shows a screenshot of a Windows-style dialog box titled "Desktop Scaler". The dialog box has a standard title bar with a minimize button, a maximize button, and a close button. The main content area is divided into several sections. At the top, there is a section labeled "My computer" with a small icon of a computer. Below this is a horizontal slider bar with markers at 100%, 150%, and 200%. Under the slider bar is a checkbox labeled "Advanced Mode" which is checked. Below the "Advanced Mode" section is a section titled "Advanced Control". Inside "Advanced Control", the resolution is set to "1280 * 1024". There is a checkbox labeled "Manual Input" which is unchecked. Below the "Manual Input" checkbox are three spinners for "Icon Size" (set to 32), "Icon Spacing" (set to 75), and "Font Size" (set to 11). Below these are three dropdown menus for "Icon Font", "Caption-Bar-Font", and "Menu-Bar-Font", all of which are set to "Tahoma". A bracket on the right side of the dialog box, labeled "MANUAL INPUT CONTROLLERS", points to the "Font Size" spinner and the "Menu-Bar-Font" dropdown menu. At the bottom of the dialog box are four buttons: "Ok", "Cancel", "Apply", and "Reset".
